Software Update Release Notes

*** Please forward this email to the appropriate users in your organization ***

FSSA Technology Services has released a software update to the following product:

CORM

The following changes occurred to this product as a result of the update. For more information about these changes, refer to the attached user guide.

(Crisis Only) Display the Presumptive DD Eligibility Button for Existing Episodes

With this update, the system displays the Presumptive DD Eligibility button in the demographic information area for existing episodes.

Previously, the system displayed the Presumptive DD Eligibility button only when an eligibility record did not exist for Crisis episode.

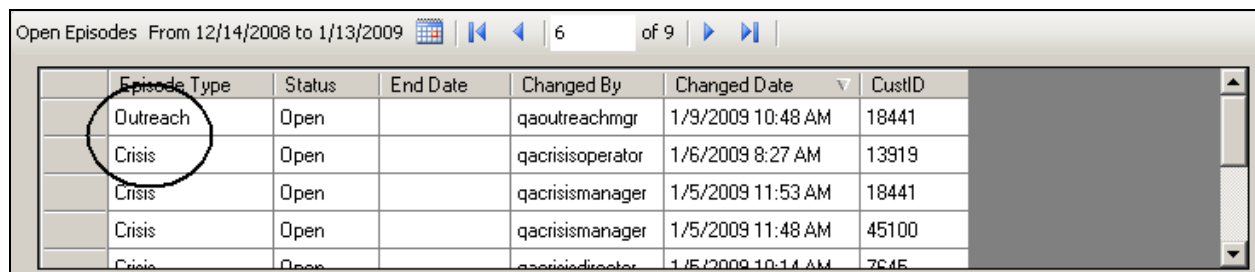

Now, the system also displays the Presumptive DD Eligibility button when you select an open Crisis episode with a status other than Eligible or Ineligible.

Change the Functionality of the View Menu for Read-Only Users

With this update, users with the Read-Only role can view the service information for any open Crisis or Outreach episode for a consumer, but cannot change the data.

Previously, Read-Only users could only view Outreach episodes - Crisis episodes did not appear in the Open Episodes grid when the user selected All Open from the View menu.

Now, when a Read-Only user selects All Open from the View menu, the system displays both Outreach and Crisis episodes, as shown in the following illustration:

Open Episodes From 12/14/2008 to 1/13/2009

Episode Type	Status	End Date	Changed By	Changed Date	CustID
Outreach	Open		qaoutreachmgr	1/9/2009 10:48 AM	18441
Crisis	Open		qacrisisoperator	1/6/2009 8:27 AM	13919
Crisis	Open		qacrisismanager	1/5/2009 11:53 AM	18441
Crisis	Open		qacrisismanager	1/5/2009 11:48 AM	45100
Crisis	Open		qacrisismanager	1/5/2009 10:14 AM	7645
